

Henderson Memorial Public Library Records Retention Policy

Henderson Memorial Public Library, like other public entities in the State of Ohio, must retain certain records from year to year. Although the Ohio Revised Code does not set guidelines for public libraries, the Board of Trustees of Henderson Memorial Public Library adopts the following policy for records retention:

Records Retention Commission

The Records Retention Commission for Henderson Memorial Public Library is comprised of the Board of Trustees and the Fiscal Officer. The Commission meets annually for the purpose of approving records to be disposed of. The Fiscal Officer serves as the Records Officer and prepares the list of records to be disposed of. The list is then sent to the Ohio Historical Society (OHS) for approval.

Records Retention File

A central file is permanently maintained to serve as the official record of all actions taken by the Records Retention Committee. This file contains the minutes of the Committee's meetings and all inventory records, disposal lists, approvals and certificates related to the retention or disposal of records.

Records Disposal Procedures

Records considered transitory in nature with durations listed as "Until no longer of administrative value" may be disposed of without certification notice to the OHS. Such record series are noted on the record retention schedule as "No RC-3."

Before eligible public records are to be disposed of, the Records Officer must inform the OHS of the disposal through submission of OHS Form RC-3, giving the OHS fifteen (15) business days to select for its custody those public records that it considers to be of continuing historic value.

The OHS may not review or select for its custody any records pursuant to Ohio Revised Code Section 149.432 providing confidentiality of library records and patron information.

Records of possible local historical value will be offered to the library's Archival Trust in lieu of destruction, and if accepted will be accessed, used and disposed of as determined by the policies and procedures of the Archival Trust.

Unless otherwise noted, retention schedules apply to original documents only. Copies or duplicates may be disposed of when determined to be no longer of administrative value.

Litigation Holds

No record may be disposed of when subject to, or likely to be subject to, current or pending litigation, claim, or proceeding.

No employee who has been notified by the Library of a litigation hold may alter or delete an electronic record that falls within the scope of the hold. Violation of the hold may subject the individual to disciplinary actions, up to and including dismissal, as well as personal liability for civil and/or criminal sanctions by the courts or law enforcement agencies.

Computer Backups of Records

Computer backups of any of the records listed will be retained until superseded or no longer of administrative value. Backups and archived computer data are not reasonably accessible, and are expensive and unduly burdensome to recover.

Categories of Records

Records fall into two categories – Permanent and Non-Permanent. The *attached list* shows the retention period of specific records. It has been compiled from recommendations of the State Auditor's Office and the Ohio Historical Society, along with Federal guidelines for retention of certain records.

As an association library, we will continue to comply with these policies and procedures.

State Records
Management Program

No:

Records and Printing
RM-01

Effective:

January 31, 2020

Issued By:

Matthew M. Damschroder, Director

1.0 Purpose

The purpose of this policy is to establish guidelines on retention, transfer and disposal of records.

2.0 Policy

The State Records Management program provides technical assistance to agencies in developing and administering an effective records management program. In accordance with Ohio Revised Code requirements pertaining to the creation, distribution, retention, preservation and final disposition of records, the following procedures shall apply.

2.1 Each state department, agency, institution, board, commission or entity shall:

- 2.1.1 Appoint a records management officer and report the name, address and telephone number of the person so designated to the state records management program office.
- 2.1.2 Review existing records and record retention schedules in their office(s) to determine that schedules are appropriate and current for the purpose of establishing and retaining the records.
- 2.1.3 Submit "Record Retention Schedules," for all record series that are not currently scheduled or current schedules that require revision, to the state records management program office.
- 2.1.4 Establish internal procedures for the regular and orderly transfer or disposal of records in accordance with the retention periods established in the general schedules or record retention schedules. Such internal procedures shall include obtaining approval for the destruction of such

records from the records management officer and a method of properly documenting records disposals.

- 2.1.5 Submit an annual Certificate of Compliance to the state records management office by December 31 of each year. The Certificate of Compliance shall be signed by the agency records management officer and the agency director.

This policy supersedes any previously issued directive or policy and will remain effective until canceled or superseded.

1.0 Purpose

The purpose of this electronic **records** policy is to (a) establish uniform electronic records guidelines for all state agencies; and (b) support the creation and maintenance of electronic records to ensure **integrity**, usability and survivability.

A glossary of terms found in this policy is located in Appendix A - Definitions. The first occurrence of a defined term is in **bold italics**.

2.0 Policy

2.1 Electronic information is a record if it satisfies the criteria defined by Ohio law.

2.1.1 Electronic records are compilations of **data** that are created or received by an agency or agency employee during the course of official duties and that document the organization, functions, policies, procedures, operations, or other activities of the office, as defined by ORC 149.011.

2.1.2 In an electronic environment, records may exist in structures other than that of familiar documents traditionally found in paper record-keeping systems.

2.1.3 Electronic records may be **public records** as defined by ORC 149.43 and, thus, subject to the public access provisions of ORC 149.43 (B).

2.1.3.1 Certain IT and telecommunications systems and systems infrastructure records may not be subject to release. Information such as but not limited to configurations, schematics, IP addresses, systems administration, security controls, business continuity, and incident response may not constitute information subject to mandatory disclosure. Ensure "security records" and "infrastructure records" have been properly identified as required in ORC 149.433.

- 2.1.4 Electronic records are subject to audit and legal proceedings such as discovery and subpoenas.
- 2.2 Electronic records should be managed effectively as part of a comprehensive records management program.
 - 2.2.1 In accordance with ORC 149.34 (A), the "head of each state agency, office, institution, board, or commission shall...establish, maintain, and direct an active continuing program for the effective management of the records of the state agency...".
 - 2.2.2 Employing records management procedures (i.e., scheduling systems/files to allow for the legal **destruction** of data) will facilitate the most cost effective use of the state's computer resources.
- 2.3 State agencies, boards and commissions should keep and manage their electronic records in compliance with standards, best practices and guidelines.
 - 2.3.1 Agencies should make the fullest possible commitment to the required use of open, public, non-proprietary standards that facilitate communication between multiple systems and software.
 - 2.3.2 American National Standards Institute or other industry-wide standards, Office of Enterprise IT Architecture and Policy-issued best practices should be used where applicable.
- 2.4 Work processes and tools should support the creation and management of electronic records.
 - 2.4.1 Provision for adequate maintenance, **disposal** and preservation of electronic records should be built into work process and tools so that electronic records management is a routine and time-efficient activity.
 - 2.4.1.1 If private communication accounts or privately owned portable computing devices are permitted to conduct state business, agencies shall ensure that electronic communication records documenting state business are retained in accordance with the agency's record retention schedule.
 - 2.4.2 Appropriate descriptive data about electronic records must be captured at the time of creation. Unlike paper records, that data cannot be determined at a later date.
 - 2.4.3 Appropriate records management principles should be an essential component in the design of new systems or the upgrading of existing systems.
- 2.5 Electronic records should be created and maintained in reliable and secure systems.

STATE OF OHIO ADMINISTRATIVE POLICY
ELECTRONIC RECORDS

- 2.5.1 Agencies should identify systems that create and maintain records. The development, modification, operation and use of these systems should be documented and measures should be taken to ensure reliability and security of records over time.
- 2.5.2 Reliability refers to a record's authority and trustworthiness at the time of creation. To ensure reliability, agencies must establish procedures for creating official records electronically.
- 2.5.3 Agencies must take measures to prevent unauthorized access to electronic records.
- 2.5.4 Data must be captured that document the context, content and structure of electronic records. Context establishes who created the record and the transaction of which it was a part. Content is the actual data. Structure is the format of the record. Structure must be captured so that the record can be migrated into the latest generation of hardware and software as necessary.
- 2.6 In most cases, electronic records should be maintained in electronic form, because preserving the context and structure of and facilitating access to those records are best accomplished in the electronic environment.
 - 2.6.1 Electronic records can be classified as system-dependent or –independent.
 - 2.6.2 System-dependent records are records that require an electronic environment to provide meaning, context or accessibility. System-dependent records should be migrated at least every five years.
 - 2.6.3 System-independent records are records that can exist independently of an electronic environment. System-independent records may be reformatted, with necessary metadata, into an eye-readable media.
- 2.7 Maintaining and providing access to electronic records over time is a shared responsibility.
 - 2.7.1 Records managers and information technology managers of the originating agencies, the Department of Administrative Services' State Records Administrator and the State Archives of Ohio must work together to manage, preserve and provide access to electronic records.
 - 2.7.2 **Transferring** all historically significant electronic records from the originating agencies to the State Archives is neither cost effective nor practically feasible. However, in cases where the State Archives does not take physical custody of electronic records, staff will provide appropriate guidance to ensure long-term accessibility and physical preservation consistent with the applicable retention schedule.

3.0 Authority

ORC 125.18

4.0 Revision History

Date	Description of Change
05/01/1999	This Policy supersedes all previously released memoranda or policies on this topic.
01/21/2005	Removed responsibility references throughout the policy. Updated to current policy format. No substantive changes were made to policy content.
10/13/2016	Incorporated content from the rescinded Ohio IT Bulletins ITB-2007.01, "Electronic Communication and Public Records," and ITB-2006.01, "Public Records Requests Concerning IT and Telecommunications Systems." Transferred policy content to a new State of Ohio Administrative Policy Template. Re-numbered policy to IT-07 to be consistent with new numbering format.
10/13/2018	Scheduled policy review.

Appendix A - Definitions

- a. Data. Coded representation of quantities, objects and actions. The word, "data" is often used interchangeably with the word, "information," in common usage and in this policy.
- b. Destruction. Rendering IT-related property unusable and its data unrecoverable through shredding, incineration or other equivalent procedure.
- c. Integrity. Guarding against improper information modification or destruction, and includes ensuring information non-repudiation and authenticity.⁷
- d. Public Record. Any record that is kept by any public office, including, but not limited to, state, county, city, village, township and school district units. Exceptions to the public record definition are outlined in detail in Ohio Revised Code (ORC) Section 149.43.
- e. Records. Records include any document, device, or item, regardless of physical form or characteristic, created or received by or coming under the jurisdiction of any public office of the state or its political subdivisions, which serves to document the organization, functions, policies, decisions, procedures, operations, or other activities of the office (ORC 149.011).
- f. Transfer or Disposal of Records. All records are the property of the public office concerned and shall not be removed, destroyed, mutilated, transferred, or otherwise damaged or disposed of, in whole or in part, except as provided by law or under the rules adopted by the records commissions provided for under sections 149.38 to 149.42 of the Revised Code or under the records programs established by the boards of trustees of state-supported institutions of higher education under section 149.33 of the Revised Code. Such records shall be delivered by outgoing officials and employees to their successors and shall not be otherwise removed, transferred, or destroyed unlawfully (ORC 149.351).
